

Repeated Course Work:

Federal regulations limit the number of times a student may repeat a course and receive financial aid for that course. This limit applies whether or not the student received financial aid for earlier enrollments in the course. If a student retakes a course that is not eligible for financial aid, a recalculation of aid is done to exclude the credits for the repeated course. Note: Students must also adhere to the [College's Repeat Policy](#).

- A student may receive financial aid to repeat a previously passed course one additional time.
- A student may receive financial aid when repeating a previously failed course (0.0 or Z), regardless of the number of times the course was attempted and failed.
- **A student, who is taking a course (see chart below) that requires the student to enroll in multiple times to meet degree requirements, may receive financial aid for these courses.**
