

Arithmetic Boost

A refresher program for basic arithmetic

Have you taken the Arithmetic placement test twice in the past year and not gotten a math level? Do you need to take a math course? Do you have a Reading level of 3?

If yes, Arithmetic Boost can help!

Arithmetic Boost is a non-credit self-study program designed to help you refresh your knowledge of whole numbers, fractions, and decimals. The only cost is \$12 for the textbook.

In the Boost program, you will study assignments in your textbook, apply your learning by doing math problems, and work with a tutor as needed. You should expect to spend about an hour or two a day for several weeks working on assignments. When your assignments are complete, you will take a short quiz. Passing the quiz qualifies you to retake the placement test.

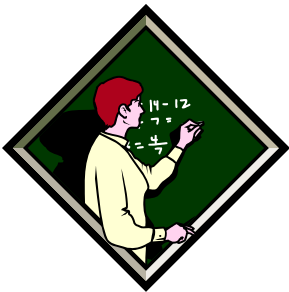

To begin the Boost program, come to A&S 192 on:

Mondays 3 pm - 6 pm

Wednesdays 9 am - 12 pm

Thursdays 2 pm - 5 pm

For more information, call the Mathematics Department at 483-1073.
